10 or more varieties: Contains King Alfred, The First, Olympia, Helios, Sir Watkins, Brightling, Croesus, Bonfire, Horace, and Homer, and may have some other fine varieties in it...\$13.00 per bushel, \$3.50 per peck

Incomparabilis Mixture: Helios, Sir Watkins, Brightling, and Croesus \$11.50 per bushel, \$3.25 per peck

Short Cup Mixture: Contains Helios, Sir Watkins, Brightling, Croesus, Bonfire, Homer, and Horace.....\$12.00 per bushel, \$3.25 per peck

Our bulbs which we list by the bushel and peck are equal or superior in quality to those sold by the count by others at higher prices. They are healthy and of good blooming sizes, some doublenose and some singlenose or splits. A peck usually contains 50 to 75 bulbs, depending on the size of the bulbs. A singlenose or split should give one bloom, a doublenose will often give two. Singlenose are often preferred for outdoor planting as a bushel of singlenose will fill more land than a bushel of doublenose.

The bulbs used in making up mixtures are the same quality as those sold as separate varieties.

If you state your preference as to size in ordering by the bushel, we will give you the size you prefer if possible. If you are willing to accept run-of-field as second choice if we cannot furnish the size you wish, please indicate this on your order. Our average-sized doublenose run around 250 bulbs to the bushel. There will probably be more bulbs to the bushel in varieties with smaller flowers.

If you are interested in Brightling, Bonfire, or Homer, be sure to order this year and as early as possible as we were fortunate in obtaining some very nice bulbs of these varieties to offer our customers this year but do not expect to have them for sale after this season.
